

Aloe Vera Care Tips

Aloe barbadensis

Origin: Northeast Africa

Height: 1-2 ft (30-60 cm)

Light: Bright light, with some direct sun in winter.

Water: Keep soil lightly moist spring through fall, slightly drier in winter. Do not allow the soil to dry out completely.

Humidity: Average room humidity.

Temperature: Average room temperatures 65-75°F/18-24°C

Soil: Cactus potting mix. Or add 1 part coarse sand with 2 parts all-purpose potting mix.

Fertilizer: Spring through fall, feed monthly with a balanced house plant fertilizer.

Propagation: Cut off new offsets in spring or early summer. Allow the cut portion to dry for a day or two to prevent the sap from oozing, then, pot it in barely moist sandy potting mix.
